# Guaranteed for Life!

Every Jerith fence is backed by our Lifetime Warranty. This guarantee covers our products against rust, defects in workmanship and materials, as well as chipping, peeling, or cracking of the FencCoat™ finish for as long as you own your Jerith fence. We were the first fence manufacturer to include a Lifetime Warranty on its products. While other fences may offer a similar guarantee, consider why a Jerith warranty means so much more.

First, we have manufactured our aluminum fences for more than 40 years, so we know how well they hold up over time. Most competing products have been on the market for less than 10 years. They simply do not have the experience that we have in fencing.

Secondly, fences are the only product that we make. Therefore, we concentrate all of our research and development efforts into producing the best fence possible. This is of utmost importance to our growth and success as a company.

Finally, we test our fences to back up every claim we make. Producing the highest quality fences and standing behind our products 100% has helped us become the largest aluminum fence manufacturer in North America.

You must have confidence in the manufacturer of your fence or the warranty will have no value at all to you. Over the past 40 years, we have earned a reputation for delivering what we promise. And, we won an American Business Ethics Award to prove it! That is why Jerith's warranty means more to you.

## Aluminum Fences of Distinction<sup>™</sup>

The Aluminum Fences displayed in this brochure have a distinctive appearance that will complement any home. Jerith fences offer the attractiveness and protection of traditional wrought iron fencing without the maintenance. They are available in a wide variety of styles, colors, and heights that add prestige and value to any property. No other fence will do so much to enhance the beauty of your home, pool or yard.

All Jerith fences are constructed of an exclusive high-strength aluminum alloy called HS-35<sup>™</sup> (see page 14 for details). This remarkable material has the strength of steel, but will never rust, even in coastal areas or around swimming pools. Plus, Jerith's durable powder coated finish is guaranteed not to crack, chip or peel for as long as you own your fence. Our polyester powder coating, called FencCoat<sup>™</sup>, is an environmentally safe, high quality alternative to paint (see page 15 for details). When applied to a Jerith fence, FencCoat<sup>™</sup> is twice the thickness and hardness of a typical painted finish. It is far more durable, fade-resistant, and scratch-resistant than other coatings, which is why we can give a Lifetime Warranty on our finish.

A Jerith fence is the best choice whenever you want elegant, long-lasting protection. Producing high quality products at reasonable prices has made Jerith an industry leader for over 40 years. Insist on Aluminum Fences of Distinction<sup>™</sup> by Jerith – anything else is second best!

*Jerith*

## Presenting Jerith...

Jerith is a family business that is now in its third generation. We are the oldest and largest manufacturer of aluminum ornamental fences in North America. Decorative fences constructed from aluminum were first designed and manufactured by Jerith in 1961. Since that time, we have become a leader in the fencing industry. We are known for our high quality products and outstanding service.

All fabrication and assembly of Jerith products is performed at our 444,000 square foot facility in Philadelphia, PA. We moved into this building in 2001 after outgrowing our previous locations due to the remarkable growth of our company. We are a participating member in many organizations which promote product excellence, such as ASTM, the Powder Coating Institute, and the American Fence Association. In 1995, Jerith was one of only four companies selected nationally to receive the prestigious American Business Ethics Award from the American Society of CLU & ChFC.

Jerith offers a tradition of quality and service to our customers. We are confident and proud that our fences are built to the highest standards in the industry. That is why we were the first fence manufacturer to give a Lifetime Warranty on every item we sell. No other fence manufacturer can match our combination of experience, quality and service.

## A Fence to Fit Every Need

There are a wide variety of Jerith fence styles available in three colors and several heights. You can be sure that there will be a Jerith fence to enhance the beauty of your home, pool or yard.

### Residential Fence Styles:

- #101 This traditional wrought iron design has its points even across the top.
- #100 Similar to Style #101, but with staggered picket tops.
- #111 This version of Style #101 is built to accept finials on the pickets instead of the standard spear points. (See Page 13 for information about finials.)
- #401 Similar to Style #101 but with a 1<sup>5</sup>/<sub>8</sub>" space between pickets. This fence will keep most pets in your yard. The narrow spacing also makes it difficult for children to obtain a foothold on the fence.
- #202 A classic design with a smooth rail on top rather than points. Our Best Seller!
- #200 Variation of Style #202 which combines the safety of a top rail with traditional spear points below.
- #402 1<sup>5</sup>/<sub>8</sub>" spaced version of Style #202 for those who do not want exposed points on their fence, but want the added security of a narrow space between pickets.
- Lexington This distinguished wrought iron design has elegant curves connecting the pickets. Available with standard points or finials centered in the arch.
- Concord Similar to the Lexington, but with pickets between each arch, as well as inside. Pickets may have either standard points or finials.
- Ovation This two rail fence has a simple design specifically created to meet the pool enclosure code drafted by the U.S. Consumer Product Safety Commission. (See Page 10 for more information about this design and pool code.)

### Regency Fence Styles:

- (Made with larger components. Rings are available. Details on pages 8 & 9.)
- Buckingham Similar in design to Style #101 except the pickets do not extend below the bottom rail.
- Kensington Similar in design to Style #111 except the pickets do not extend below the bottom rail.
- Windsor Similar in design to Style #202 except the pickets do not extend below the bottom rail.

America's Fencing Choice™

## Need Something Stronger?

Jerith's prestigious Regency Aluminum Fences satisfy a growing demand for stronger residential fences that don't look like industrial products. Our Regency Fences use slightly larger components to create a section that is 33% stronger than our standard Residential Fences for just a little more money. These noble fences seamlessly blend into any yard or pool area without appearing to be out of place.

The basic Regency Fence styles are Buckingham, Kensington and Windsor. In these classic designs, the pickets do not extend beyond the bottom rail to give a smooth, clean look. To create a truly "regal" appearance, these styles can also have decorative rings attached between the top two rails. With the rings installed, the designs are known as Buckingham Plus, Kensington Plus and Windsor Plus. Naturally, we only use rings made from cast aluminum, not plastic or steel, to prevent rust and ensure durability. These are the only Jerith fence styles available with rings.

Everything you would expect in a Jerith fence is found in a Regency Fence. Our exclusive HS-35™ Alloy is used in every rail and post. The standard FencCoat™ finishes are available for every style. And, of course, every fence is guaranteed for as long as you own it!

If you want a stronger, more impressive fence for your home without having an industrial look, then a Jerith Regency Fence is perfect for you. Whether you choose one of the standard styles or a Plus design, a Regency Fence will surely make your home a stately manor!

## Rest Easy with a Jerith Fence Around Your Pool

Jerith fence is the perfect choice to surround your swimming pool. Its aluminum construction eliminates rust, while its durable FencCoat™ finish withstands the moisture and chemicals found in a pool environment. Most building codes require swimming pools to have self-closing and self-latching gates around them. These safety features are standard on all Jerith walk gates. In addition, our pickets have less than 4" between them, so children cannot squeeze through.

Our Ovation Fence was specifically designed to meet a Swimming Pool Enclosure Code developed by the U.S. Consumer Product Safety Commission (CPSC). This fence has nearly four feet of space between its two horizontal rails. This virtually eliminates the possibility of a small child climbing over this fence. Also, a child-resistant magnetic gate latch is standard on all Ovation gates. This magnetic latch keeps the release mechanism out of a child's reach and has a built-in keylock for added security. It is also available as an option for all other Jerith gate styles.

The chart on the right shows all of the Jerith fence styles and heights that meet the CPSC Pool Code. You will notice that there are a few "Modified" designs that are altered specifically to meet the Pool Code (These altered styles are shown below.) For 54" high Modified Styles #200 and #202, the only variation from the standard designs is that the pickets do not extend below the bottom rail. Our 57" tall fences combine this same picket change with a narrowing of the gap between the top two rails, which allows our 57" Modified Styles #101, #111, Lexington, and Concord to have at least 45" between the rails as the Pool Code requires.

Be sure to verify the requirements for swimming pool fencing in your area before ordering. There is a Jerith fence to meet nearly every code. Select the one that's right for you!

### Style and Height Combinations to Meet Most Pool Codes

Style / Height	48"	54"	57"	60"	72"
Ovation	✓				
Lexington, Concord			✓ (Modified)		✓
101, 111			✓ (Modified)		✓
100					✓
200, 202		✓ (Modified)		✓	✓
401, 402	✓			✓	✓
Buckingham				✓	✓
Kensington				✓	✓
Windsor		✓		✓	✓

These fences meet pool codes that require a fence to be 48" above grade with either:

- (a) any rail spacing and less than 13/4" between pickets, or
- (b) one 45" rail spacing between the tops of two adjacent rails and less than 4" between pickets.

Gates will be self-closing and self-latching. Magna-Latch latches may be required for some gates to meet these codes. Check local building codes for your requirements before ordering.

## A Gate to Fit Every Personality

All Jerith fence styles have matching gates. The gates resemble the fence design, but with a welded frame and bracing for structural support. By fabricating in this manner, a Jerith gate can hold a 250 pound load without collapsing!

Our walk gates are self-closing and self-latching. These safety features are essential around a swimming pool to help prevent accidents involving children and pets. Our exclusive handle latch, the EverLatch, has a built-in keylock for added security and safety. Its magnetic operation has no mechanical resistance to latching, so it works every time. The EverLatch is provided as the standard latch for all Jerith Residential and Regency gates. Ovation gates come with a Magna-Latch, which can be locked as well.

In addition, you may want to add some cast aluminum scrolls to enhance the appearance of your gates. Our LS-2 scroll is ideal for a gate with a top rail, while LS-1 or SS-1 scrolls can highlight any gate with 5/8" pickets.

If you are looking to differentiate your walk gate from the rest of your fence, you will want to consider our Accent™ Gates. These attractive gates enhance our standard designs with gently arched top rails. They are completely welded with no bracing to interfere with the appearance of their curves. Accent Gates are made in either 3', 4' and 5' widths.

To create an impressive entrance to your home, use a Jerith Estate Gate. These beautifully arched double gates really show off your "Estate". A pair of these gates can span up to a 20' opening. They are fabricated so that they can arch either upward or downward, and are offered in Style #101, #111, or #202. These gates are constructed from larger aluminum components that are welded at every joint. The gate height increases by one foot from the lowest side of the gate to the highest side to create a dignified presence that will distinguish your entryway!

Since a gate is the only part of your fence that moves, its design and construction are critical to ensure years of trouble-free operation. No other gate can match the quality and strength found in a Jerith gate!

## Add an Extra Touch of Elegance to Your Jerith Fence

Our cast aluminum decorative accessories give any Jerith fence a distinctive appearance. Choose from a selection of scrolls, finials and ball caps to create a custom look that will add an extra touch of elegance to your fence. These castings are available in our standard black, white, and bronze FencCoat™ finish, as well as a gold finish to accentuate any fence or gate.

While these accessories may look like cast iron, their aluminum construction prevents them from rusting. So, enjoy the beauty of a custom wrought iron fence with the maintenance-free ease of aluminum - only from Jerith.

**America's Fencing Choice™**

## **Jerith's Exclusive HS-35™ Alloy** *The Strength of Steel Without the Rust*

You no longer have to choose between the maintenance-free ease of aluminum and the strength of steel for your fence. The best of both worlds is available only from Jerith. Through extensive research and testing, Jerith has developed an aluminum alloy called HS-35™. This remarkable material has the strength of steel without the rust!

Our HS-35™ Alloy has a minimum yield strength of 35,000 pounds per square inch (psi), which is significantly higher than the 25,000-33,000 psi strength found in many steel fences. Even more impressive is Jerith's advantage over other aluminum fences, which have yield strengths of only 16,000-25,000 psi.

Every post and rail in Jerith aluminum fences is extruded from our exclusive HS-35™ Alloy. While some aluminum fence manufacturers claim to use similar alloys, they seldom use it in both their posts and rails. In addition, Jerith is the only manufacturer that uses a high strength alloy in its pickets as well. They are over 50% stronger than other aluminum fences. We don't cut corners on the strength of our products!

An independent testing laboratory has proven that a typical Jerith Residential Fence can support over 350 pounds per section without any structural failure and our Regency fence can hold about 500 pounds! With strength like this, Jerith fences will certainly satisfy your fencing needs for years to come.

Always look for our logo on the sections, post caps, and gates to ensure that you are receiving Jerith quality and our exclusive HS-35™ Alloy. Other fences may look like Jerith, but none are as strong, durable or well-built as ours.

## FencCoat™ - Jerith's Powder Coated Finish

Jerith's technologically-advanced powder coating system allows us to produce a high quality, long-lasting finish which is also environmentally friendly. When applied to a Jerith fence, FencCoat™ is twice the thickness and hardness of a typical acrylic (or "wet paint") finish. Consequently, it is far more durable, fade-resistant, and scratch-resistant than other coatings. And, because we coat our own products, Jerith can consistently control the quality of its finish, unlike most aluminum fence manufacturers.

Since its introduction in North America about 40 years ago, powder coating has become the fastest growing finishing technology. Powder coating contains no solvents and therefore emits negligible amounts of volatile organic compounds (VOC's) into the atmosphere. Wet paints, however, cause severe pollution, both through the emission of VOC's when they are cured and by the generation of excess paint which is considered a hazardous waste. In addition, Jerith's aluminum is chemically prepared for its FencCoat finish with an environmentally safe non-chrome pretreatment, unlike most wet paints.

To prove the durability of our powder coating, we have tested it extensively. FencCoat™ endured 3,000 hours of harsh salt-spray and humidity resistance, as well as 5 years of continuous exposure in Florida. Other aluminum fence manufacturers have performed similar tests on their own coatings, yet they only survived 1,000 hours of salt-spray and humidity testing and 1 year of Florida exposure (as stated in their literature). That is why we are confident enough to guarantee that our FencCoat™ finish will last for as long as you own your fence!

**America's Fencing Choice™**

## Tips on Choosing Your Contractor

Fence companies that install Jerith products are independent contractors. Since you may not have a lot of experience hiring contractors to work around your house, here are some important tips to follow when selecting one to help you get your money's worth.

**Communication:** Be precise, so that the contractor understands exactly what you want done. Effective communication enables contractors to quote on performing the same work with the same materials.

**Competitive Bids:** If possible, find two or three contractors to quote on your project. This allows you to choose the one that offers you the best value. This is not necessarily the contractor with the lowest price. A company's reputation, workmanship and warranty should always be considered along with the price. Be wary if one price is significantly lower than the others. Try to determine why the cost difference is so great. Remember, you generally get what you pay for.

**Insurance:** Most states require contractors to have worker's compensation, liability, and property damage insurance. Some contractors try to lower their costs by not carrying insurance. This may place you at a legal risk, so make sure your contractor has all of the necessary insurance.

**References:** Ask for references from your contractors, along with recent installation sites. Inspect them to get a sense of the contractor's workmanship. Quality may be the main reason one contractor's price is higher (or lower) than the rest.

**Contract:** Get the contract in writing! It should include a full description of the job, a payment schedule, and an estimated time of completion. If you want to purchase a Jerith fence, make sure it is explicitly stated in the contract. Do not sign any contract which states that "Jerith-type" fence will be installed. Language such as this allows the contractor to substitute generic materials without your approval. (The Jerith logo can be found on every post cap, gate and rail that we sell. This allows you to easily confirm that you have received genuine Jerith products.)

**Payment Schedule:** Most contractors require a deposit before starting a job, but payment schedules vary. Some contractors ask for 50% down and 50% upon completion, while others request 1/3 down, 1/3 during installation and the balance upon completion.

**Project Changes:** If your project should change in any form, it is important to note this in the contract. This allows for revised prices and time tables to be set. What seems to be a minor alteration may cause the contractor to incur significant unexpected costs and delays. Try to keep changes to a minimum for this reason.

We hope that these suggestions make choosing your contractor a little easier. Remember, if you have any other questions concerning a contractor, you can contact your local Chamber of Commerce or Better Business Bureau for additional information. There are plenty of good contractors around, so try to find the one that suits your needs best. Good luck!
